ERRATA

Adopted: June 25, 2002

Released: June 26, 2002

1. On March 7, 2002, the Wireless Telecommunications Bureau released an Order, DA 02-545, granting in part the captioned application (Terion Order). The present order corrects a few inadvertent errors and omissions in the Terion Order.

2. Condition 11 (on page two of the attachment to the Terion Order) states that the total number of channels must not exceed "914 (equivalent to a total authorized spectrum of 2.742 MHz)." To be consistent with paragraphs two and ten of the Terion Order, however, Condition 11 should have stated that the total number of channels must not exceed "954 (equivalent to a total authorized spectrum of 2.862 MHz)." The Terion Order also unintentionally omitted eleven carrier frequencies from the attached carrier frequency list. As a result, the released list contains only 943 carrier frequencies instead of the intended 954. The following are the omitted carrier frequencies (in kiloHertz) that should have appeared on the list:

8055 8058 8061 9081 9084 9087 9090 9093 9096 9099 9102

3. In paragraph six of the Terion Order, the Bureau incorrectly referred to the Interdepartment Radio Advisory Committee (IRAC) as the "Interdepartmental Radio Advisory

Council” and incorrectly stated that the IRAC coordinates the *licensing* of shared government / non-government frequency allocations. The IRAC coordinates the *use* of shared government / non-government frequency allocations.

William W. Kunze
Chief, Commercial Wireless Division
Wireless Telecommunications Bureau
